cloth slike, which cannot be unraveled or pulled Out.

They are all made with the highest mechanical skill and all warranted to work well on all kinds of goods, from the lightest fabric to heavy leather. In particular, we would sail sitention of all two our new family Newing machine. It has been manufactured

of the Weel Patent.

NO. 1. Is avery convenient style which can be workestly hand of foot, on or off its own table. For convenience of shipping and also for large manufactories where it is necessary to place a number of machines into long bench making one table snawer for them all. Price 800.

NO. 2. With Walout or Mahogany Table, either with or without flox Top, which leens down. Price 800 and \$100.

5100. 4. This Machine has a long arm, to accom-se large work. It runs at a high rate of spec-

NO. 4. This Machine has a long arm, to accommodate large work. It cans at a high rate of speed runseselly, anoths without a doubt, the best Machine for Tailoranse, ever offered to the public. It is also pasultarly fitted for plantation work, as it is very shopine as a substantial and durable, with but little liability to get out of order. Price \$150.

NO. 5. This is a new and cheaper style, and a great variety or work. It has been gotten up with reference to furnishing a strong and durable, yet light and tasty machine, at a leasprice than either of the above. It runs very easy, rapidly, and is pronounced the best machine now in market for \$250.

of the above. If this very was, the solution of the pronounces the best machine oow in market for ASO. S. This is a machine got up on an entirely new principle, different from soything ever before allowed to the public, and we combleadly assert that for tunity use than not an equal. It is very light and lasty, runs very rapidly, is almost noticies in the operation, and uses a stranger Membras, it is so arranged as to be utterly impossible for it to miss stitches. It has a tension on bota sides, and carries a large supply of thread on the under spool. The motions are gained by two small cranks that run without perceptible noise. The two threads are worked in such a manuscrass never to pull both at the same time, and consequently, little fisble to break. worked in such a manner as never to pail both at the same time, and consequently, little liable to break. The seam is very classic and the thread deer not break in weathing. It will do course work better than any clear, machine now in market, as it uses silk, cotion, or linnen with equal faulity. Price \$50 Descriptive Circulars turnished gratis.
